

# TUBE GEAR LTD

## Appendix II

# PRODUCT DISPLAYS

## Universal Packet Display Systems

These display systems are intended to simplify the stocking and managing of the Tube Gear blister pack range. They are ideal for placing products in a shop front area to maximise the impulse buy potential of a highly consumable range of fittings.

When teamed with part numbered red backing cards, stock taking and reorder becomes a simple task and the clear plastic packets with colour coded cards keep the stock clean and make identification easy.

### Part No. ZHOOK

Consists of one row of hooks that has 8 product prongs; these can hold up to 4 of the large size blister packs and up to 8 of the smaller sized packets.

They hook together vertically to form any length drop of rows, the top row being the only section that needs to be fixed to a permanent backing e.g. counter wall area or end of racking bins.

### Part No. ZROTARY

This rotating stand display has 96 product prongs, that can hold up to 4 of the large blister packs or up to 8 of the smaller packets.

The display works perfectly in shop floor areas, where customers can browse through the range on the carousel whilst waiting to be served, thus maximising the impulse buy potential.

The ZRotary is the ideal silent salesman.

### STOCK PACKAGES

Fast moving stock packages can be tailored to suit customers' requirements.
