

Couplings - Fittings

DUMMY COUPLINGS

**Part No
0118**

**Part No
0117**

These couplings are made to a similar pattern to the standard BS AU138a/b couplings and are designed to provide secure parking locations for the tractor couplings. To ensure the suzi coils remain undamaged while parked, the overall length of the dummy couplings has been kept to a minimum.

The couplings incorporate the same locking mechanism as the standard couplings and are plated to the same specifications.

Trailer C-Lock

**Part No
0119R**

locked onto male unlocked male coupling

The trailer C-lock has been designed to be compact (length when unlocked - 98mm, locked length - 110mm, dia - 38mm), rugged and simple to operate. When locked onto the trailer male c-coupling it prevents coupling up to, or removal of, the male coupling.

To fit the coupling, simple remove the key and push the lock onto the male, sliding the outer sleeve forward until it clicks. To remove the lock, insert the key and turn. Many key combinations available

**Part No
0119VOR**

Application as above but with reflexite label identifying and preventing the movement of the trailer. This part is normally used during servicing.
