

INDUSTRIAL PUSH-IN - Fittings

John Guest

PLASTIC - IMPERIAL

This range of plastic push-in fittings provide a secure joint without the use of any tools making them quick and easy to fit. They can be used on nylon, plastic, calibrated copper or Bundy Tubes to carry air, water, petrol, diesel and many other liquids, except acids. We recommend the use of tube supports with nylon or plastic tubing.

We do not advise the use of plastic push-in fittings on vehicle brake lines

Maximum working pressure 10 bar. Minimum burst pressure 25 bar. Temp: -20 to +70°C
