COMPACT ANTI-KINKING COILS

Part No 2127

Part No 2128

As well as the security of these coils being manufactured by one of the largest suppliers to most OE truck manufacturers, these have been designed with the UK fleet specifically in mind. Many of the larger UK supermarket fleets are now specifying these coils to be supplied above all others due to their excellent long term performance and cost benefits.

These coils have a 40mm ID coil diameter with a 4m working length. They meet DIN standards 74323 and 74324 with a burst pressure that exceeds 57 bar at 23°C and a safety factor of 3 at 70°C. These coils have the strength of Polyamide with the flexibility of Polyurethane and are benchmarked as best in their class.
