

# Air Brake - Tubing

## EUROBOOM

Amended 14.04.10

### Fitting Kit

All the fittings required to suit all popular applications

**Heavy Duty Construction**  
reinforced in all the major stress areas

**Push-in air line fittings**  
quick and easy connection

**Maintenance-free sealed bearing**

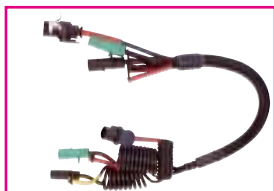

**Electrical cable and air lines**  
externally mounted for easy access

**Industry standard connectors**  
utilise existing truck connection points

**Reinforced front plate**  
resistant to impact damage

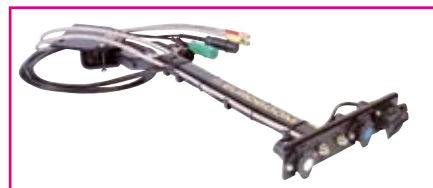

**Tube Gear electrical sockets**  
for a secure connection

**Standard M18 Nipples**  
connect to most standard coils

### An umbilical option

provides a total tractor-trailer connection that is neat, secure and extremely robust

### In some sliding fifth wheel applications

stainless steel braided air lines are recommended

Please call us with the following information:

-  **Make & Model of Vehicle**
-  **Whether Sliding or Fixed 5th Wheel**
-  **Height of 5th Wheel (from chassis to top of 5th Wheel)**
